

Compression Knee Immobilizer

Stabilize Your Steps, Heal with Confidence

The Compression Knee Immobilizer is a sturdy, reliable choice for knee injury recovery.

Its design combines comfort with functionality, providing secure immobilization while ensuring user comfort throughout the healing process.

Key Features:

- Contoured, reinforced stays with center "I" beam provide rigidity and a custom fit.
- Soft, foam laminate material adds comfort and resists staining. Can be easily trimmed to size.
- Adjustable elastic straps for even compression.
- Universal design fits most.

Clinical Applications:

- Post-surgical immobilization
- Patellar fracture
- Patellar dislocation
