

Tri-Panel Knee Immobilizer

tri-panel knee immobilizer is a type of brace designed to provide stability and immobilization to the knee joint, often used in post-operative care or for injuries such as ACL, PCL, MCL, and LCL injuries, tibial plateau fractures, meniscal repairs, and patellar tendon repairs.

Features and Benefits

- Effective support for knee immobilization during recovery
- Comfortable fit to prevent chafing and irritation
- Adjustable design to accommodate leg size and swelling changes
- Easy to put on and take off, even for users with limited mobility
- Durable construction for long-term use without losing support
- Washable material for easy cleaning and maintenance
- Supportive structure with rigid/semi-rigid components to prevent movement
- Secure fastening with elastic straps for a snug fit
- Soft padding at contact points for enhanced comfort and pressure relief
