

Alcohol Prep Pads

Sterile Skin Preparation | 70% Isopropyl Alcohol | Individually Wrapped

Product Overview

Alcohol Prep Pads are small, individually wrapped sterile wipes made from non-woven fabric and saturated with 70% isopropyl alcohol. They are designed to disinfect the skin before injections, blood draws, IV insertions, and other medical procedures. Available in medium and large sizes, they provide convenient and reliable single-use skin preparation.

Features and Benefits

- Effective Skin Preparation: Helps disinfect the skin before medical procedures.
- 70% Isopropyl Alcohol: Provides fast and effective antiseptic action.
- Individually Wrapped: Supports convenient, hygienic single-use application.
- Portable and Convenient: Easy to store, carry, and use when needed.
- Multiple Size Options: Available in medium and large sizes.
- USP Standards: Meets USP standards.
