

MEDMAX ABSORB PREMIUM

Maximum Absorbency | Breathable Design | Skin-Friendly Comfort

Introducing the Multi-Layered Protection of Underpads:

Medmax Absorb Premium underpads provide maximum absorbency and advanced comfort for high-need incontinence care. Featuring a multi-layer design, each pad combines a super-absorbent core for superior dryness, a soft non-woven topsheet for gentle skin contact, and a breathable backsheet to support airflow and reduce irritation. Ideal for hospitals, long-term care, and home settings requiring extended protection.

Features and Benefits

- High-Absorbency Core: Locks in moisture quickly to maintain dryness.
- Blue Indicator Line: Indicates the non-absorbent, outer side of the pad.
- Comfort-Touch Topsheet: Soft non-woven surface gentle on sensitive skin.
- Breathable Backsheet: Promotes airflow to reduce skin irritation and discomfort.
- Reliable Performance: Designed for extended wear in demanding care settings.
- Skin-Safe & Latex-Free: Suitable for users with sensitivities or allergies.

Effective Odor Control

The superabsorbent polymers that absorb fluids also help trap and neutralize odors. This creates a healthier and more pleasant environment for the patient and their caregivers.

Durable and Tear-Resistant

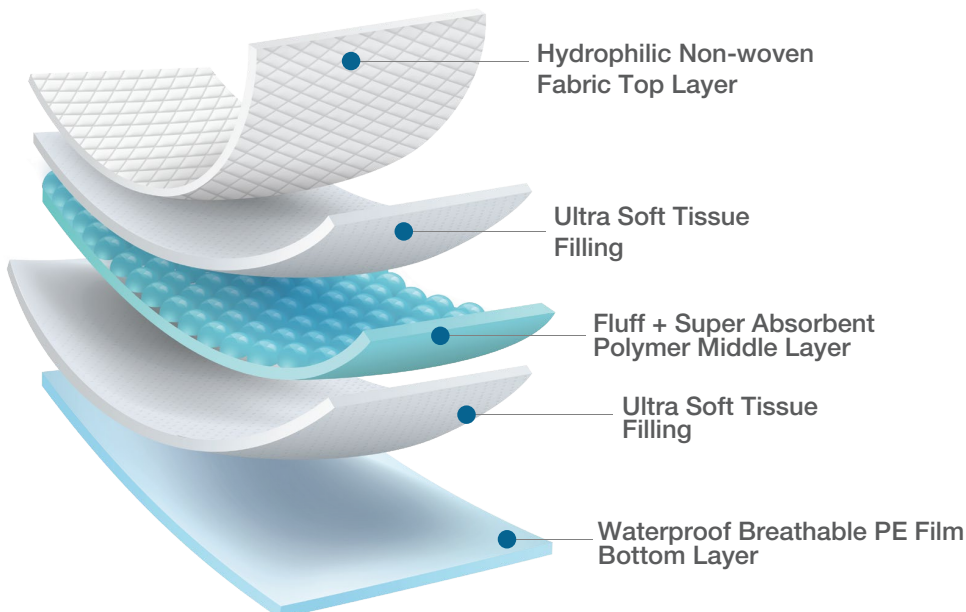

The strong backsheet not only protects against leaks but also prevents the pad from bunching or rolling up when a person moves. This increases comfort and ensures the pad stays in the proper position.

Product Specifications

- Absorbency Level: Maximum
- Top Layer: Soft non-woven comfort layer
- Core: High-capacity absorbent core
- Backsheet: Breathable, skin-safe barrier
- Material: Latex-free
- Use: Disposable, single-use underpad
- Weight Capacity: Up to 400 lbs
